

ENVIRONMENT POLICY

This policy applies to all activities undertaken by Raptor pest control and impacts upon key suppliers and customers.

We are committed to minimising the environmental impact of our operations. In particular, we will achieve this through our commitment to:

- Comply with all relevant legislation, Regulations and Industry Codes of Practice
- Regularly review the environmental impact of our activities, endeavour to reduce our overall environmental impact and prevent waste using best practice techniques;
- Records of all waste transfer dockets for disposing of used rodenticides and insecticides
- Sustain a programme of continual improvement in environmental performance incorporating suitable measurement and monitoring mechanisms;
- Work with key suppliers to encourage them to develop environmental best practice; and
- Improve resource efficiency (including our use of water, energy and raw materials). This policy is publicly available on request.

Although the Managing Director has ultimate responsibility for Environment, all employees have a responsibility within their own areas of work to help ensure that the ethos is embedded within the whole of the company.

The policy review date is [date].
